Recommended Citation

This Syllabus is brought to you for free and open access by the NJIT Syllabi at Digital Commons @ NJIT. It has been accepted for inclusion in Computer Science Syllabi by an authorized administrator of Digital Commons @ NJIT. For more information, please contact digitalcommons@njit.edu.

Course Syllabus

Intro To Computer Networks

Code: CS 356

Semester: Fall 2025

Time: (Section 003) TF :4:00PM to 5:20PM

Mode: Face-to-Face

Location: Newark

Instructor: Asad raza

Webpage: <https://people.njit.edu/profile/ar2632>

Office: KUPF118(Newark)

General Class Protocol

Communication: Mostly you will get a reply within 48 hours.

- ❖ Study-related, topic-related, and class-related questions: All questions of this type should be posted under the 'Discussions' section within Canvas so that other classmates may participate in the discussion and see my response.
- ❖ Personal matters (grades/concerns/others): asad.raza@njit.edu (*Put Your Course ID and section number in the subject line + a brief summary of the email E.g. Fall 2022 CS356101 - Car breakdown. Study-related, topic-related, and class-related will **NOT** be answered via email nor Canvas message*).

Office Hours:

- ❖ Tuesday 2:00 PM to 4:00 PM
- ❖ By appointment: If the above timings don't work for you then send me an email make and appointment

Course Management

We will use Canvas to have informal and friendly conversations about topics related to the course, including assignments, problems, ideas, etc. You are encouraged to participate. Please be absolutely assured that any question or idea is welcome.

Course Description

Alternative Description (NJIT Catalog):

This course introduces computer networks, with a special focus on Internet architecture and protocols. Topics include layered-network architectures, addressing, naming, forwarding, routing, communication

reliability, the client-server model, and web and email protocols. Besides the theoretical foundations, you will acquire practical experience by programming reduced versions of real Internet protocols. Prerequisite: CS 280. This course introduces computer networks, with a special focus on Internet architecture and protocols. Topics include layered-network architectures, addressing, naming, forwarding, routing, communication reliability, the client-server model, and web and email protocols. Besides the theoretical foundations, you will acquire practical experience by programming reduced versions of real Internet protocols.

Prerequisites: CS 280

Tentative Schedule of Topics & Hands-on – (Topics may be reduced or added)

- ❖ **Chapter 1: Introduction**
- ❖ **Chapter 2: Application Layer**
- ❖ **Chapter 3: Transport Layer**
- ❖ **Chapter 4: Network Data Plane**
- ❖ **Chapter 5: Network Control Plane**
- ❖ Chapter 6: Link Layer and LANs
- ❖ Chapter 7: Wireless Networks
- ❖ Chapter 8: Network security

Textbook

- ❖ Computer Networking - A Top-down Approach (7th or 8th Edition) - *Mandatory*. 8th Preferred.
- ❖ Purchase options from the Publisher: starting at \$9.99/month
<https://www.pearson.com/store/en-us/pearsonplus/p/9780135928615.html>
- ❖ Resources: https://gaia.cs.umass.edu/kurose_ross/ppt.php

Additional materials will be posted on Canvas.

Grading Criteria

- ❖ **Homework/Assignments [35%]**. 4-5 hands-on practical home assignments
- ❖ **Quizzes [10%]**. 3-4 in class quizzes
- ❖ **Mid-term Exam [20%]**. Midterm Exam will be conducted in the middle of semester. More details will be provided before the exam.
- ❖ **Final-Exam [30%]**. Final Exam will be conducted by the end of the semester. More details will be provided before the exam.
- ❖ **Class Participation [5%]**. Class participation includes attendance, participation in discussions, answering questions and submitting homework/assignments on time.

Letter Grades. The conversion of raw grades will be based on grouping the raw grades into clusters and then assigning a letter grade to each cluster. The letter grade assignment will be in accordance with the graduate grade legend (<https://www.njit.edu/registrar/policies/grading.php>).

New Jersey Institute of Technology

Ying Wu College of Computing

COMPUTER SCIENCE

Exams: All exams will be in person and given as Canvas quizzes with Lockdown Browser or on paper. All the exams will be **closed book**.

Lateness Policy. Please be advised that **no late work will be accepted unless** you have the approval of the Dean of Students (DOS) regarding special circumstances.

Make-up Testing. No make-up quizzes or exams is allowed unless you have the approval of the Dean of Students (DOS) or the Department Chair regarding special circumstances. Two missed exams will result in the final grade of an 'F'.

FYI: The NJIT [academic calendar](#) for the latest semester.

Course Policies

Bring Your Own Device.

Students are expected to bring with them a reasonably capable computer to be used for pop quizzes and other in-class exercises. The laptop needs to have a working webcam.

Email

Use of your NJIT email is strongly encouraged.

Mobile Devices

Let's try and be reasonable and respectful of other students.

Grade Corrections

Check the grades in coursework and report errors promptly. Please try and resolve any issue within one week of the grade notification.

Absenteeism

If you miss a class, it's up to you to make up for the lost time. Missing both midterm and final exams leads to an automatic F in the course. Missing over 70% of class attendance also leads to an automatic F in the course. If you miss either the midterm or final exam, you must contact the DOS within 2 working days from the day the reason for the absence is lifted with all necessary documentation. If DOS approves, the instructor will decide on the make up exam.

Incomplete

A grade of I (incomplete) is given in rare cases where work cannot be completed during the semester due to documented long-term illness or unexpected absence for other serious reasons. A student needs to be in good standing (i.e. passing the course before the absence) and receives a provisional I if there is no time to make up for the documented lost time; a letter (or email) with a timeline of what is needed to be done will be sent to the student. Note that for most cases an I would be resolved within few days, not

New Jersey Institute of Technology

COMPUTER SCIENCE

months, and not the following semester! Not showing up in the final will probably get you an F rather than an I.

Collaboration and External Resources for Assignments

Some homework problems will be challenging. You are advised to first try and solve all the problems on your own. For problems that persist you are welcome to talk to the course assistant or the instructor. You are also allowed to collaborate with your classmates and search for solutions online. But you should use such solutions only if you understand them completely (admitting that you don't understand something is way better than copying things you don't understand). Also, make sure to give the appropriate credit and citation.

Academic Integrity

Academic Integrity is the cornerstone of higher education and is central to the ideals of this course and the university. Cheating is strictly prohibited and devalues/dillutes the degree to which you are working. As a member of the NJIT community, it is your responsibility to protect your educational investment by knowing and following the academic code of integrity policy that is found at:

<http://www5.njit.edu/policies/sites/policies/files/academic-integrity-code.pdf>

[\(Links to an external site.\)](#)

Please note that it is my professional obligation and responsibility to report any academic misconduct to the Dean of Students Office. Any student found in violation of the code by cheating, plagiarizing, or using any online software inappropriately will result in disciplinary action. This may include a failing grade of F, and/or suspension or dismissal from the university. If you have any questions about the code of Academic Integrity, please contact the Dean of Students Office at dos@njit.edu
